Project: RFB 2017-08: Isle of Palms Marina Bulkhead Rehabilitation
Revised Q&A

Addendum #4

2R. Q: Will Longshore and Harbor Workers Compensation insurance be necessary for the work to be performed?

A: Since USL&H insurance is a federal workers' compensation requirement, the contractor should contact their insurance representative and verify whether or not this additional insurance is required for the specific marine activities proposed by the contractor.

For more information: <https://www.dol.gov/owcp/dlhwc/lainsreq.htm>

13R.Q: The question was raised at the pre-bid about the requirement of a marine license (since working on a bulkhead at a marina is definitely considered marine work). The SCLLR board makes that determination; not public or private owners. Will the City please run that by the SCLLR before the bid as we are quite sure they are incorrect about this determination?

A: After further review, the project does include a water based component therefore contractors will be required to have a marine contractor's license.
